2026 Edition

Table of Contents

- **Part 1:** System Overview & Core Workflow
- **Part 2:** Visual User Guide (Screens & Buttons)
- **Part 3:** Detailed Module Guide (Audit, Meds, HR)
- **Part 4:** Troubleshooting & Support

🏗️ Part 1: How the System Works

This system is designed to manage the entire lifecycle of a care home, from admitting a resident to managing the staff who care for them.

The Core Workflow

The system connects **three main pillars**:

1. **Residents:** The people you care for.
2. **Staff (HR):** The people providing the care.
3. **Operations:** The building, stock, and compliance.

```
RESIDENT ADMITTED -> CARE PLAN CREATED -> MEDICATION SCHEDULED
       |                    |                     |
       v                    v                     v
  STAFF ASSIGNED  ->  DAILY LOGS RECORDED ->  COMPLIANCE AUDITED
```

🖼️ Part 2: Visual User Guide

A breakdown of the key screens and what every button does.

1. The Dashboard (Home Screen)

This is your "Mission Control". It gives you an instant summary of the home's safety status.

Button / Area	Icon	Function
Search Bar	🔍	Type any name ("Alice", "John") to jump straight to their file.
Alerts Bell	🔔	Shows Red Alerts for Low Stock or Accidents.
Quick Actions	⚡	Shortcuts to "Add Resident" or "Report Incident" without navigating menus.

2. Medication Screen (eMAR)

Replacing paper MAR charts with a digital safety system.

```
+-------------------------------------------------------------+
|  MEDICATION ROUND: MORNING (08:00)                          |
+-------------------------------------------------------------+
|  1. Paracetamol 500mg                                       |
|     Dose: 2 Tablets  |  Stock: 24 (OK)                      |
|     [ GIVE (Green) ]      [ REFUSE (Red) ]                  |
+-------------------------------------------------------------+
```

Worklow:

- Clicking `GIVE` reduces the stock count automatically.

- Clicking **REFUSE** asks for a mandatory reason (e.g., "Resident Sleeping").

3. Staff Rota (Scheduling)

Located in **HR Management → Staff Profile**.

```
| MON | TUE | WED | THU | FRI |
|-----|-----|-----|-----|-----|
| 08-20| OFF | 08-20| 08-20| OFF |
| [Red]| [Grn]| [Red]| [Red]| [Grn]|
```

Red Boxes = Working. **Green Boxes** = Day Off.

📘 Part 3: Detailed Module Guide

1. Resident Management

Purpose: To store digital care files.

- **Admitting:** Click "Add Resident", fill in name, DOB, and room number.
- **Risk Assessments:** Upload documents defining fall risks or dietary needs.

2. Incident Reports

Purpose: Legal documentation of accidents.

The system features a **6-Month Overview** chart to track trends (e.g., "Are falls increasing?"). Reports can be exported to PDF for CQC inspections.

3. Compliance & Audits

Purpose: To ensure the home meets regulatory standards.

- **Action Required Filter:** Instantly shows expired checks (e.g., "Fire Alarm Test Overdue").
- **Evidence:** You can upload photos of safety certificates directly to the record.

4. User Management (Security)

Who can see what?

Role	Access Level
Admin	Full Access (Can delete records).
Staff	Care Plans, Meds, and Rota only.
Client	Personal profile view only.

🚀 Summary & Next Steps

This system acts as a "Closed Loop". Every action feeds into a report.

- If you give a pill → Stock drops.
- If you verify a training cert → Compliance score goes up.
- If you log an incident → Analytics dashboard updates immediately.

--- END OF MANUAL ---

Staff Comprehensive Profile

Employee: Abdullah

Position: 67777 | Date of Export: 1/6/2026

1. Personal & Employment Details

Full Name	Abdullah
Email	butt60902@gmail.com
Phone	nm,n,m,
Date of Birth	2025-11-2
NI Number	Yes
Home Address	kllklkl
Position	67777
Department	Care
Service Setting	Nursing Homes
Start Date	11/9/2025
Employment Type	N/A
Contract Details	N/A
Status	Active

Next of Kin

Name	N/A
Relationship	N/A
Contact	
Address	N/A

Compliance & Eligibility

DBS Status	N/A
Right to Work	N/A
Professional Reg	jkjkjk
Passport No	N/A
Visa Required	N/A
Visa Expiry	N/A

2. Training & Certifications

Training: Infection Control

Field	Value
Module Name	Infection Control
Category	N/A
Completion Date	11/17/2025
Expiry Date	11/5/2025
Status	Expired
Notes	kdlkdldk

Attachments / Documents:

Training: First Aid

Field	Value
Module Name	First Aid
